*Complete specification data and testing methods are available upon request.

A "C20" ASTM additional requirement was added to assure conformance to the most stringent ozone/weathering specifications available. This addition allows the rubber a 20 year life.

The addition of fire retarding agents milled directly into the rubber compound creates a self extinguishing feature which enables it to be used with type "B" vents. Listed with IAPMO certification No.3121

The built in 20° pitch allows adaptability to almost any roof pitch including 45°

The pull tab design and easy smooth tear grooving is intended to eliminate razor knives and allow for a circular hole

Four (4) sizes accommodate flues & vents from 1/4" diameter through 18" diameter
