Material Safety Data Sheet

**VALVE REGULATED BATTERY**

**Manufacturer's Address:**
2009 San Bernardino Road  
West Covina, CA.  91790

**Emergency Contact:**
626-813-1234  
800-255-3924 after hours

---

**SECTION 1 - PRODUCT IDENTIFICATION**

**PRODUCT NAME:** Valve Regulated Lead-acid Battery  
**COMMON SYNONYMS:** VRB, VRLA, SLAB, Recombinant lead/acid: RG, GPL, AGM, PVX, or FD series, D8565 series  
**DOT DESCRIPTION:** Batteries, wet, non-spillable  
**TRANSPORTATION INFORMATION:** Not subject to DOT regulation per 49 CFR 173.159 (d)  
**CHEMICAL FAMILY:** Lead-acid Storage Battery  
**FORMULA:** Not Applicable  
**PRODUCT USE:** Electric Storage Battery

---

**SECTION 2 - HAZARDOUS INGREDIENTS**

**NOTE:** Exposure to these materials will not occur under normal conditions of use. This product description or Trade name contains toxic chemicals subject to the reporting requirements under Section 313 of Title III “The Superfund Amendment and Reauthorization Act of 1986” and CFR 371 and California Proposition 65.

---

**SECTION 3 - PHYSICAL AND CHEMICAL CHARACTERISTICS**

**BOILING POINT:** NA  
**VAPOUR PRESSURE (mm Hg):** NA  
**MELTING POINT:** Polypropylene > 320°F.  
**VAPOUR DENSITY (Air = 1):** NA  
**SPECIFIC GRAVITY:** Lead, approx. 13  
**% VOLATILE BY VOLUME:** None  
**SOLUBILITY IN WATER:** NA  
**REACTION IN WATER:** NA  
**PHYSICAL STATE:** Solid unit  
**PH:** Not Applicable  
**APPEARANCE:** Battery: Rectangular polypropylene case with metal terminals, may be contained within an outer casing of aluminum or steel. Lead/lead oxide (internal): Grey metallic solid; brown/grey oxide.  
**FLASH POINT (CLOSED CUP):** Polypropylene case - 675°F  
**AUTOIGNITION TEMPERATURE:** Not Applicable  
**FLAMMABLE LIMITS IN AIR (% BY VOLUME):** LOWER: NA  
**UPPER:** NA  
**FIRE EXTINGUISHER MEDIA:** Halon, dry chemical  
**SPECIAL FIRE FIGHTING PROCEDURES:** Batteries do not burn or burn with difficulty. Extinguish fire with agent suitable for surrounding combustible materials. Cool exterior of battery if exposed to fire to prevent release of lead compounds and fumes.  
**UNUSUAL FIRE AND EXPLOSION HAZARDS:** None

---

**SECTION 4 - PHYSICAL HAZARDS**
INCOMPATIBILITY (Materials to Avoid): Keep battery case away from strong oxidizers.

STABILITY: Stable

HAZARDOUS DECOMPOSITION PRODUCTS: None

HAZARDOUS POLYMERIZATION: Will not occur.

SECTION 5 - HEALTH HAZARDS

THRESHOLD LIMIT VALUE (TLV):
- Lead - 0.05 mg/m³ Permissible exposure limit (PEL): 0.05 mg/m³
- Sulfuric Acid - 1 mg/m³ Permissible exposure limit (PEL): 1 mg/m³

SIGNS AND SYMPTOMS OF EXPOSURE: Exposure to sulfuric acid, lead, lead dioxide or lead sulfate may occur if the sealed battery case is damaged. Exposure to lead may include:
1. Chronic overexposure: Tire easily, loss of appetite, irritability, metallic taste, insomnia; toxic to nervous system, kidneys, and reproductive system.
2. Acute overexposure: Constipation, vomiting, blue line on gums, weak wrists or ankles, weight loss, yellowish skin.

Exposure to sulfuric acid (battery electrolyte) may include:
1. Chronic overexposure: Inhalation - erosion of teeth, inflammation of nose, throat, bronchial tubes.
2. Acute overexposure: Eyes - severe burns, corneal damage, blindness. Skin - severe irritation, burns, ulceration. Inhalation - respiratory irritation, inflammation of bronchial membranes. Ingestion - severe burns and ulceration of the mouth, throat, esophagus and stomach, damage to kidney and intestinal tract.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: No exposure is expected under normal use conditions. See: Signs And Symptoms Of Exposure.

ROUTES OF ENTRY: Lead - ingestion, inhalation. Sulfuric acid - skin, eyes, ingestion.

CARCINOGENICITY: See Proposition 65 Warning

EMERGENCY FIRST AID PROCEDURES: Lead/lead compounds exposure
1. Inhalation: Remove from exposure, see physician.
2. Eyes: (dry oxide) Wash eyes with copious quantity of running water for 15 minutes, see physician
3. Skin: Not a direct route of entry.
4. Ingestion: See physician.

Sulfuric acid exposure:
1. Inhalation: Remove to fresh air, see physician immediately. If person is unconscious, perform CPR, keep victim warm and at rest, it breathing is difficult, give oxygen.
2. Eyes: Wash eyes with copious quantity of running water for 15 minutes or until acid is removed, see physician.
3. Skin: Remove all contaminated clothing, flush skin with copious quantity of water until free of acid.
4. Ingestion: Do not induce vomiting, do not give anything by mouth to an unconscious person, see physician immediately.

PROPOSITION 65 WARNING: Batteries and other related parts contain lead. Battery posts, terminals, and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and reproductive harm. Batteries also contain other chemicals known to the State of California to cause cancer. Wash hands after handling.

SECTION 6 - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION: If product is involved in fire, release of dust or fumes from damaged cases may result. Use of SCBA full face or half-mask respirator with HEPA cartridge would be recommended.

VENTILATION: No

PROTECTIVE GLOVES: Use nitrile or equivalent gloves to minimize contamination if handling broken units.

EYE PROTECTION: Safety glasses, face shield, or goggles for handling broken or damaged product.

OTHER PROTECTIVE EQUIPMENT: None expected to be required under normal use conditions.

SECTION 7 - SPECIAL PRECAUTIONS AND SPILL/LEAK PROCEDURE

PRECAUTIONS IN HANDLING AND STORAGE: Exercise caution in handling and storage due to weight of units.

OTHER PRECAUTIONS: Do not allow metal or other conductive material to short circuit terminals. Heat, sparks, damage to electrical circuits, and fire may result from short circuiting. Practice good hygiene to minimize personal exposure. Battery may release hydrogen during charging or if exposed to high temperatures. Do not store in air tight container.

MATERIAL SPILLS OR RELEASE: Will not occur unless sealed case is damaged. Pick up and containerize all battery parts and materials. Limit personal exposure with gloves, eye and face protection, as noted above. Neutralize sulfuric acid with lime, soda ash, or sodium bicarbonate.

WASTE DISPOSAL: Battery parts may be recycled by EPA permitted secondary lead smelting facility or disposed of as hazardous waste pursuant to RCRA requirements.
